

# Acknowledgments

It is our pleasure to present to you the third edition of the U.S. Public Health Service Engineer's Career Planning Handbook. This handbook, originally named the Engineer's Handbook, was developed by the Engineer Professional Advisory Committee's (EPAC) Career Development Subcommittee, led by CAPT Richard Barror in April 1992 and revised in 1996 under the leadership of the 1995 EPAC Chairperson, Ms. Diane Stewart.

The first version of this handbook was published in hardback and distributed to PHS engineers en masse. The second version was published loose leaf to enable sections to be updated more easily. This third version is being made available via the [usphsengineers.org](http://usphsengineers.org) website. Each chapter is downloadable as a separate file to make updates even more easily distributed and to speed the availability of the information to all PHS engineers and architects regardless of location.

This third edition of the handbook, designated version 3.0, was the initiative of the EPAC Career Development Subcommittee led by Ms. Lisa Hayes, Subcommittee Chairperson. Chapters and portions thereof were updated by members of the subcommittee and included: CAPT Thomas Bedick (Ret.), LCDR Sean Boyd, CAPT Roger Carmichael, CAPT Joe Cocalis (Ret.), CAPT Robert Faaland, Mr. Kim Kyung, CDR Louis Lightner, LT Jennifer Martin, CDR Jacqueline Parker, CAPT George Pringle, LCDR Nathan Tatum, LCDR Charles Weir, and Mr. Mitch Williams. Assembling and editing this work was done by Ms. Lisa Hayes and LCDR Nathan Tatum. Finally, we would like to acknowledge all our colleagues, mentors, advisors and supervisors who tirelessly answered our questions in collecting this information to present to you.
